WORK EXPERIENCE

SENIOR FULL-STACK DEVELOPER

Oktria   *Sep 2020 - Present*

✓ Orchestrated enterprise-level codebase with effective CI/CD mono repo structure, featuring canary deployment strategy using GCP.
✓ Orchestrated migration of Oktria across GCP projects, ensuring seamless Svelte v3 to v4 transition with zero downtime.
✓ Enhanced the developer's workflow by incorporating type safety and implementing RFCs, while also establishing a strong and reliable end-to-end testing framework using Cypress.

LEAD DEVELOPER | FOUNDER

Salman2301   *Est. 2018*

✓ Established successful freelancing business, driving user growth, and managing an active forum with 5000+ views and 400+ users.
✓ Achieved Fiverr level-one seller with 4.9 stars from 31 reviews.
✓ Strengthened client- and user-management skills in high-pressure project environments.

LEAD DEVELOPER

MyPharm   *2019 - 2020*

✓ Developed versatile Svelte data table component enabling filters, sorting, and connection to data sources.
✓ Designed and launched a full-stack codebase on AWS Lightsail, employing an Ubuntu virtual machine.
✓ Implemented an industry-grade codebase to enhance the ease of developer workflow.

EDUCATION

T.J.S Engineering college   *2016 - 2018*

I attained my Mechanical Engineering degree from Anna University in 2018, graduating with distinction and achieving a CGPA of 7.68.

CERTIFICATIONS

CodinGame: Coding Speed - Legend Level   *2023*
Wix Velo Certificate   *2023*

ONLINE ACHIEVEMENTS

✧ **Fiverr:** Attained a remarkable 4.9/5 star rating from clients.

✧ **GitHub:** Several of my code contributions are publicly available as open source.

✧ **Codewars:** Received an esteemed 523 honor recognizing problem-solving proficiency.

✧ **CodinGame:** *Coding Speed Legends* achieved for competitive coding under time constraints.

WORK EXPERIENCE

SENIOR FULL-STACK DEVELOPER

Oktria   *Sep 2020 - Present*

✓ Orchestrated enterprise-level codebase development using robust CI/CD mono repo and canary deployment strategy.

✓ Led full-stack development (Svelte, Strapi, Postgres) since 2020, incorporating TypeScript, TailwindCSS, and PostgreSQL.

✓ Implemented Message Queue system for current architecture using BullMQ and NodeJS.

✓ Seamlessly migrated Oktria to new GCP Projects and transition Svelte v3 to v4 without downtime.

✓ Utilized CloudRun, Containerization, and canary deployment via Cloud Build for efficient project deployment.

✓ Orchestrated Pulumi for Infrastructure as Code, ensuring version-controlled resource configuration and deployment.

✓ Established centralized document sharing to facilitate team collaboration and foster improvement initiatives.

✓ Enhanced query performance by 23x using SQL Analyzer and strategic column indexing.

✓ Engineered Oktria's management reporting for streamlined insights with custom made charts.

Reference: Ricardo Rocha (Project Manager) - (+31) 6 83793307   Jeanine Rocha (Lead Designer) - (+31) 6 83664133

LEAD DEVELOPER | FOUNDER

Salman2301   *Est. 2018*

Freelance Business and Forum:

✓ Established and managed a successful freelancing venture, specializing in customizing Wix websites for clients, resulting in substantial user growth.

✓ Administered an online forum with over 5000 views and a user base of 400+.

✓ Attained recognition as a Fiverr level-one seller, maintaining an exceptional rating of 4.9 stars from 31 reviews.

Professional Development and Growth:

★ Developed adept skills in client management, time allocation, and pressure handling through diverse roles encompassing Marketing, Client Engagement, Coding, Taxation, and Auditing.

★ Collaborated with a global clientele, primarily from the US, UK, and Australia, fostering both valuable relationships and agency partnerships.

★ Successfully raised hourly rate from $15 to $120, responding to increased demand, although balancing such demand led to reevaluation.

★ Exemplified unwavering passion for coding, leading to a decision to transition from freelancing due to repetitive nature.

★ Leveraged proficiency in coding to accept a full-time sub-contractor role at Oktria.

LEAD DEVELOPER

MyPharm   *2019 - 2020*

✓ Crafted a versatile Svelte-based data table component capable of handling filtering, sorting, input, and integration with data sources.

✓ Undertook this endeavor as a side project during freelancing, gaining invaluable experience in Svelte, database management, and server technologies.

✓ Employed AWS Lightsail, within an Ubuntu virtual machine, for efficient code deployment.

✓ Orchestrated full-stack development and deployment for a practical real-world application.
